Strong together

Through our shared vision,
our innovative strength and our mutual support, we
strive to create a strong, sustainable future.

Residue today, commodity tomorrow aiktechnik.ch

The best service

From conception to installation and beyond, we are committed to supporting you to ensure that your needs are met. Our service begins with a thorough analysis of your requirements and continues by supporting you throughout the process to ensure that every detail meets your expectations. Even after the project is completed, we remain available to ensure that everything runs smoothly and your satisfaction is guaranteed.

Qualified contact persons

As experienced experts in environmental technology, we are your reliable partner. Our employees not only have passion and many years of experience, but also keep up to date with the latest technology through continuous training. We fully understand the complexity and challenges of this field and therefore offer you the best possible advice and solutions for your environmental technology projects.

Innovative solutions

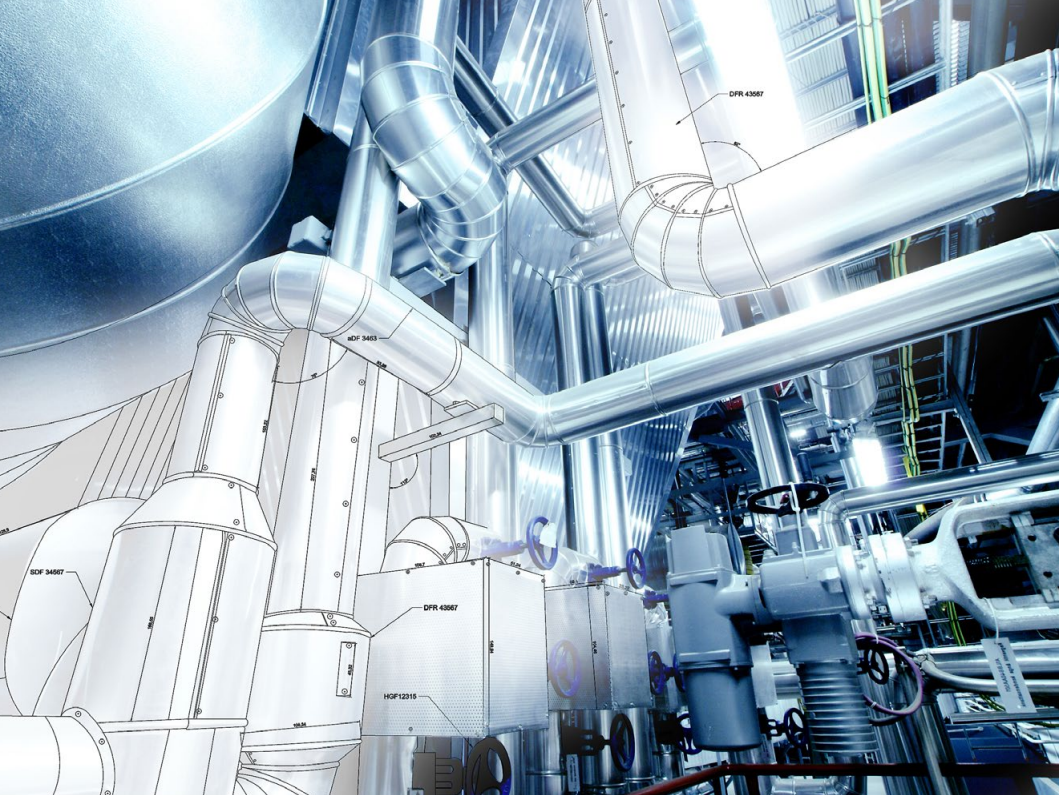

We pride ourselves on offering innovative solutions that meet or exceed current standards. Our commitment to continuous improvement drives us to constantly search for new and advanced solutions. Our pioneering spirit has already enabled us to build pilot plants, which has given us valuable insights and experience. We use this experience to offer our customers ground-breaking solutions that optimally meet their requirements.

In the service of the environment

Our three companies are dedicated to protecting the environment and are actively committed to sustainability. As part of our commitment to environmental protection, we focus on the development and operation of systems for waste processing and recycling. Through innovative technologies and processes, we strive to reduce waste, conserve resources and minimize our ecological footprint.

We are proud of the fact that we can offer process technologies and develop processes that enable us to process waste efficiently and recover valuable materials. Our processes help to recycle residual materials and reuse valuable materials. This can reduce the impact on our ecosystems and create a cleaner, healthier environment for future generations. Our joint efforts in waste management and recycling are an important contribution to the global fight against pollution and climate change.

We are here for you!

We are improving our market presence, bringing us closer to our customers and enabling us to better understand and meet their needs.

We are pooling our experience and resources and will be able to plan and implement complex projects in the future even better from a single source. This allows us to reduce the number of interfaces and make processes more efficient.

The companies AIK Technik AG, ASE Technik AG and WASCOM AG operate independently under their respective names at the Sursee and Hochdorf, sites.

Our services

The three companies AIK Technik AG, WASCOM AG and ASE Technik AG offer a wide range of services aimed at meeting the individual needs and requirements of our customers in various areas.
